RESEARCH INTERESTS

My interests are in natural language processing and deep learning. I am particularly interested in how we can build a robust and scalable AI system that can leverage diverse skills (e.g., tool use and reasoning) to aggregate possibly-heterogeneous information and answer natural language questions precisely regardless of their complexity.

My research focused on **faithful reasoning**, recently **in the context of utilizing large language models**. My work spans across (i) knowledge-grounded generation [1][4] (ii) tool-augmented reasoning [2][8][9][3][6] (iii) robust natural language understanding [5].

EDUCATION

Tsinghua University, Beijing, China

September 2019 - Present

Ph.D. Student, Computer Science and Technology

Advisor: [Minlie Huang](#)

Beihang University, Beijing, China

September 2015 July 2019

B.E., Computer Science and Technology

GPA: 3.86/4, *Rank*: 2/213

RESEARCH EXPERIENCE

Microsoft Research Asia

Sep 2022-Present, Beijing, China

Research Intern (Supervisors: Yeyun Gong, Nan Duan, Yelong Shen, Weizhu Chen)

- [Knowledge-Grounded Generation]: **ITER-RETGEN** [1], which synergizes retrieval and generation iteratively, is a strong method that enables large language models to leverage intrinsic and extrinsic knowledge flexibly;
- [Tool-Augmented Reasoning]: (i) **Synthetic Prompting** [2] elicits better reasoning in large language models with model-synthesized chain-of-thought demonstrations, achieving a new state-of-the-art on numerical reasoning, symbolic reasoning, and algorithmic reasoning tasks; (ii) **ToRA** [8] integrates natural language reasoning with program-based tool use for mathematical reasoning; ToRA-34B is the first open-source model to attain an accuracy over 50% on the competition-level MATH dataset; (iii) **CRITIC** [9] teaches large language models to correct themselves via interactions with tools.

CoAI Lab, Tsinghua University

Sep 2019-Present, Beijing, China

Ph.D. Student (Supervisor: Minlie Huang)

- [Knowledge-Grounded Generation]: **RECTIFY** [4], a Recall-then-Verify framework that exploits retrieved knowledge comprehensively, tops AmbigNQ;
- [Tool-Augmented Reasoning]: (i) **CANTOR** [3], the first non-autoregressive numerical reasoner, outperforms $174\times$ larger PaLM 62B on grade school math; (ii) **MIMAX** [6], a weakly-supervised training algorithm that is applicable to various neuro-symbolic reasoning models;
- [Robust Natural Language Understanding]: **AdvExpander** [5], a novel insertion based textual adversarial attack, reveals new robustness issues.
- [Text Generation and Evaluation]: (i) **PHVM** [7], a data-to-text generation model; (ii) **CoTK** [10], a toolkit for fair evaluation.

AWARDS

1st Prize , Comprehensive Scholarship, Tsinghua University	2022
2nd Prize , Comprehensive Scholarship, Tsinghua University	2021
3rd Prize , the National Final of "LAN QIAO CUP" C/C++ Group	2018
1st Prize , National College Students Mathematics Competition (non-math-major)	2016
China National Scholarship	2016, 2017, 2018

SERVICES	Reviewer/Program Committee: ACL, EMNLP, NLPCC, ARR	
TEACHING	Artificial Neural Network	Fall 2019 - 2022
ASSISTANT	<i>Instructor:</i> Minlie Huang	
	Object-Oriented Programming	Spring 2020 - 2023
	<i>Instructor:</i> Minlie Huang	
	<i>Also gave guest lectures and made assignments</i>
